

Safety Management

Discussion Session 1

Please propose actions to implement the safety and health program in your FYP (in the context of CS, CE, and SE):

Group 1: Management leadership part of the safety and health program.

Group 2: Worker participation part of the safety and health program.

Group 3: Hazard identification and assessment part of the safety and health program.

Group 4: Hazard prevention and control part of the safety and health program.

Group 5: Education and training part of the safety and health program.

Group 6: Program evaluation part of the safety and health program.

Group 7: Multi-employer worksites part of the safety and health program.

Group 8, 9, 10, ... : Your idea can be here :)

OPTIONAL:

Analyze levels of different gases employing sensors MQ-135, MQ-2, MQ-3, MQ-4, MQ-5, MQ-6, MQ-7, MQ-8, and MQ-9 if measurement is possible. Please use the Arduino gas sensor kit.
