

### **Project Proposal Presentations (due at week 7)**

- Each team of students will give a 5-minute talk to present the course project proposal to the class (with overhead transparencies, slides, videos, and/or other materials).
- The team should be sure to convince us that:
  - team is addressing an important problem,
  - team understands various approaches to solve the problem,
  - team has found an interesting approach to solve the problem,
  - team has a specific and detailed plan,
  - team knows when the project will be done.
- Five minutes is a very short amount of time. So please come with a presentation that is concise and to-the-point. 3 to 5 slides is a good approach to present the above-stated outline.
