Semester Project: Demo Day (15th week)

- Each team of students will give a short poster session or slide presentation describing a course project.

- The goal is to demonstrate and describe for the class in 10-15 minutes what the team has done and why it is interesting.

- The team should describe the project, using 4-8 slides on a poster or a presentation. Slides should clearly present the goals, challenges, previous work, approach, implementation, and results of the course project. The live demo is welcome :)
